

Sprint 2 Report - SafeHouse

Team: SafeHouse Keepers

2 November 2021

1. Actions to stop doing:

- a. Naming branches after developers → naming branches after sprints and user stories can help organize our work better.

2. Actions to start doing:

- a. Researching in sign-in and databases → we might need to deal with multiple users and home locations
- b. Following code convention → doing so would make coding styles consistent between developers components.

3. Actions to keep doing:

- a. Assigning stories to at least a pair → this allows the team to get to know one another and strengthen team collaboration. It's also a good way to keep one another accountable and provide different perspectives.
- b. Hosting daily standup 3 times a week → being able to have a short 15 minute meeting for the team on Mondays, Wednesdays, and Fridays has ensured that the team is up to date on all things related to the project.
- c. Researching and applying visual improvements to our product → we would like the app to appear more attractive throughout the development process, but it's hard to envision this with incomplete features. We hope to improve the UI design throughout the sprints as new features are added in.

4. Work Completed/Not Completed:

- a. Completed: User story 1
- b. Completed: User story 2
- c. Not Completed: User story 3 - Due to dynamic schedules and difficulty with constantly passing information between components, the checklist lock is incomplete. This will be pushed to sprint 3 as part of its MVP.

5. Work Completion Rate:

- a. In sprint 2, 2 user stories were completed. The total number of estimated ideal work hours was 15 hours a week, and 7-14 days per sprint. There are 6 total tasks done for sprint 2, with the average completion rate being 3 tasks per week.
