Sprint 4 Plan - SafeHouse
Team: SafeHouse Keepers
Completion Date: 30 November 2021
Revision Number: 3
Revision Date: 17 November 2021

Goal: For Sprint 4, Implement shared list functionality. With MVP finished the team can start to implement back log functionality.

Task Listing, Organized by User Story:

User story 1: As someone with a family, I want the app to have an option where I can add family members to the same task list and have our tasks sync properly so that I can see if anyone in the family is forgetting to do something before they leave the house.

> Task 1: Allow users to have multiple checklists + view personal vs shared checklists?
> Task 2 : Allow users to access family members' shared lists.
> Task 3: Shared checklists have the same information with propagating changes.
> Task 4: Ability to leave a shared task list.

Total for user story 1: 5 days

User story 2: As someone with multiple homes, I want the option to log multiple homes so that I can keep track of the tasks I need to complete before leaving each home.

> Task 1: Allow for users to set multiple locations & have a list of preferred locations.

Total for user story 2: 4 days

User Story 3: As someone who cares about my privacy, I want to be able to log out of the application so that others cannot use my account while accessing the application.

> Task 1: Implement sign out functionality

Total for User Story 3: 2 day.
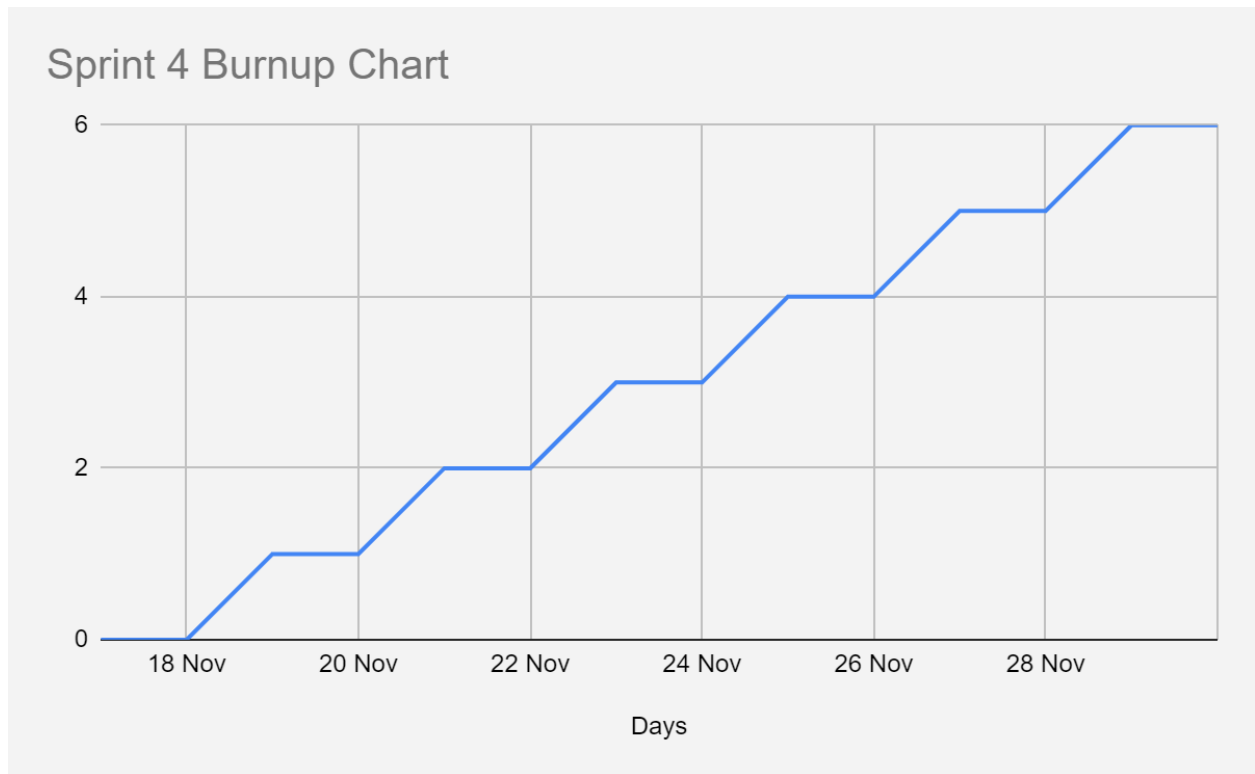

Team Roles:
Nate Lee: Product Owner
Luc Milbun: Developer
Jouse Zamudio: Developer
Clyde Li: Scrum Master
Joeny Vo: Developer
