Sprint 3 Plan - SafeHouse
Team: SafeHouse Keepers
Completion Date: 16 November 2021
Revision Number: 3
Revision Date: 3 November 2021

Goal: For sprint 3, we will implement a feature to lock the checklist when away from home. We will also look into databases, and might implement family-linking.

Task listing, organized by user story:
User story 1 ("As an individual who cares about visuals, I want the app to be more user-friendly and look more appealing so that it's easier to look at and navigate around.")
- Look into animations or new graphics (Low priority/2 days)

Total for user story 1: (2 days)

User story 2: ("As someone with a family, I want the app to have an option where I can add family members to the same task list and have our tasks sync properly so that I can see if anyone in the family is forgetting to do something before they leave the house.")
- Research into databases and google authentication(3 days)
- Register families into one account/checklist (5 days)

Total for user story 2: (8 days)

User story 3 ("As a forgetful person, I want my checklist to be locked when I'm out of the house and unlocked when I arrive home so that I don't second guess myself on the tasks I have listed.")
- Lock the checklist when away from home (2 days)

Total for user story 3: 2 Days
